DogeMiyagi

WHITEPAPER

TABLE OF CONTENTS

Mr. Dogemiyagi, one of the greatest teachers in the metaverse served not only as a cool martial arts mentor to the Doge (Karate Dog), but a golden star with deep philosophical knowledge of life.

You might not know but he has fought in many battles, many great wars, including the war on cryptocurrencies alongside Satoshi Nakamoto. But that's not even the best part. Mr. DogeMiyagi has earned the prestigious "Medal of Blockchain" award, along with spending time creating a vast collection of NFTs. Which makes things a lot more interesting.

UNSURPRISINGLY.

Mr. DogeMiyagi is extremely passionate about Mr. Miyagi from the film - Karate Kid. A collection of his most cherished moments has been assembled into a mini collage.

IT'S OKAY TO LOSE TO OPPONENT. IT'S NEVER OKAY TO LOSE TO FEAR

However, life is not all about rainbows and sunshine.

In the midst of the chilling crypto winters, **Mr. DogeMiyagi** faced the bleakest moments of his existence. The haunting echo of losses reverberated through his memory, a relentless reminder of the trials that he and many others had endured. Yet, like a phoenix rising from the ashes, he has re-emerged with newfound strength, determined to triumph over adversity. Through the power of his latest **$MIYAGI** tokens, he stands poised and unyielding, a testament to his unwavering resilience.

The DogeMiyagi ($MIYAGI) token would empower building a vibrant community laid on the foundation of the epicenter values of **Mr. DogeMiyagi** and his ferocious life experiences.

A community where likeminded people can support each other, share the life lessons of **Mr. Dogemiyagi**, support each other on their accomplishments, exchange **DogeMiyagi** NFTs, discuss cryptocurrency, and create hilarious memes is no longer a thing of dreams!

But a 'reality' you will experience soon in the DogeMiyagi universe

The DogeMiyagi token (**$MIYAGI**) will function as the central principle of everything happening within the **DogeMiyagi** ecosystem.

This includes fulfilling the role of a peer-to-peer cryptocurrency, executing cross-border payments, buying **DogeMiyagi** NFTs, governing the network, and plenty more.

In addition to diverse token utilities and real meme potential, what makes the **DogeMiyagi** token more intriguing is the underlying blockchain engineering.
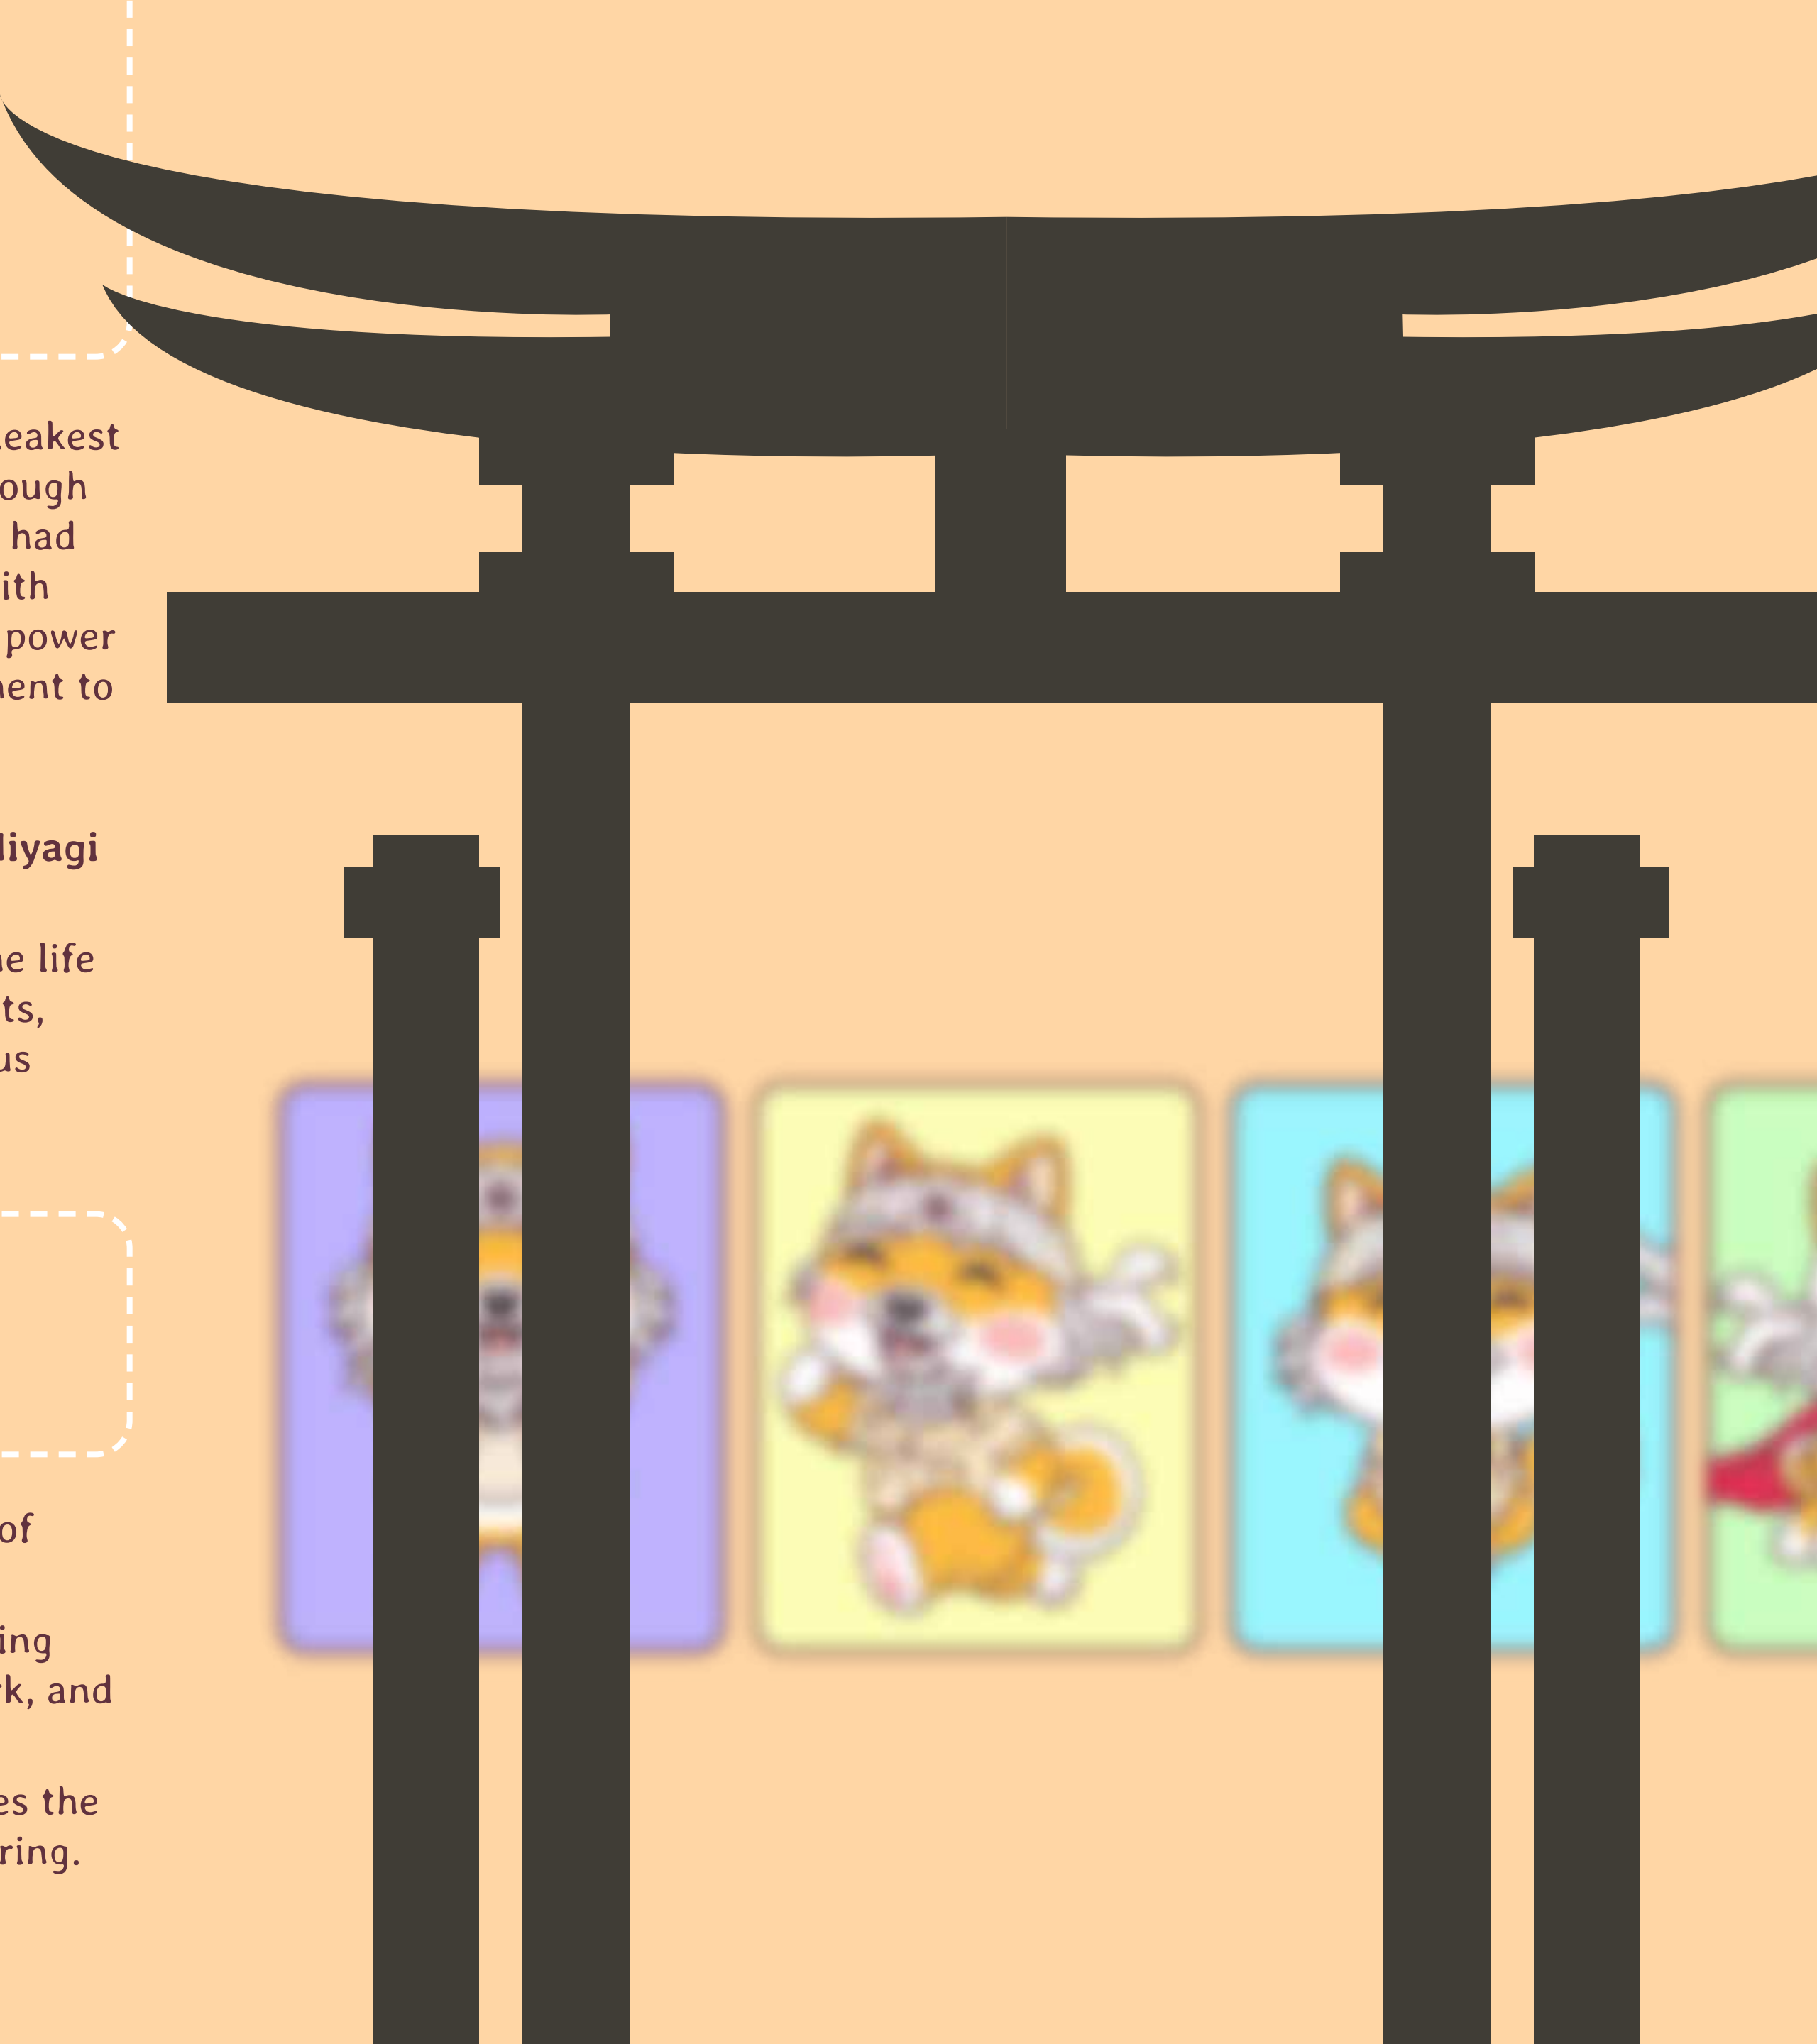

Mr. DogeMiyagi has chosen the Ethereum Blockchain to build this initiative because it is super popular, super green, and super extensive.

What's more in the bucket?

The project is 100% community-driven, decentralized, and secure. Nothing in the middle. This will be observed by renouncing the ownership after the token launch and systematically evolving the project into a fully-fledged Decentralized Autonomous Organization (DAO).

Our strong stance on Decentralization and Security comes from the following quote from **Mr. Dogemiyagi:**
"Either you karate do "yes" or karate do "no." You karate do "guess so," (get squished) just like grapes."
DogeMiyagi is a fusion of the life principles of **Mr. Dogemiyagi**. This combines the entertainment of meme culture, and sophisticated token utility. A combination of these powerful elements will shoot the **$MIYAGI** token beyond Marsto new heights. We believe that **Mr.DogeMiyagi** is on to a project that the cryptocurrency world needs!

To ensure that this fusion crosses all the planets in the Galaxy, we have laid down some strong foundation principles for the **$MIYAGI** token.

1 - QUALITY OVER QUANTITY

"You Trust The Quality Of What You Know, Not Quantity."

Doge, (aka Karate Dog) was constantly worried about not pushing himself enough, but **Mr. DogeMiyagi** would always remind him that he needs to build patience and first learn the philosophy behind martial arts, as opposed to simply learning to punch and kick well.

While designing the **DogeMiyagi** token, he knew that the meme token is part of a crowded ecosystem. To stand out, he needed to understand the true dynamics of cryptocurrency and meme culture first. Not just to try and push out another meme token.

At the heart of the strategy lies an unwavering commitment to prioritizing Quality over Quantity. **Mr.DogeMiyagi** believes that this refined and methodical approach will empower both **$MIYAGI** token holders and NFT owners to flourish at an accelerated pace. By laying a solid foundation centered on quality, the aim is to create an environment that fosters rapid and sustainable growth for community members.

2 - First Learn Then Fly

> "First Learn Stand, Then Learn Fly. Nature Rule, Daniel-san, Not Mine."

Youthful exuberance often breeds impatience, a trait that was evident in **Doge (the Karate Dog)**. Eager to confront his tormentors, he displayed an insatiable desire to master formidable karate techniques during his training sessions, rather than treading the steady path to success.

This mirrors the Web 3.0 landscape, where countless projects pledge grandiose outcomes, endeavoring to deliver them immediately after launch or within mere months. Such lofty ambitions foster a high-pressure atmosphere, eroding the trust of users.

Nevertheless, **Mr. DogeMiyagi** has meticulously crafted a tactical roadmap delineating the development plans over time. Resisting the temptation to over-promise and deliver everything instantaneously, he champions a measured approach — laying the foundation one brick at a time, steadily paving the way to greatness!

3 - Ambition & Knowledge

> "Ambition Without Knowledge Is Like A Boat on Dry Land."

Ambition never works alone. It needs knowledge on the backseat. Knowledge without ambition is like a boat on dry land. Mr. **DogeMiyagi** is all about converting ambitions into reality.

Just imagine- could you have won the school president election if you didn't have the know-how on how to connect to the student and your constituents?

Could you have topped the championship if you didn't have the fundamental knowledge of the game? No. You should let your knowledge–the practical application of your vision–set sail toward your objectives. As simple as that.

The same ideology has been adopted for **DogeMiyagi**. We intend to deliver the results by slowly working towards high ambitions and by collecting the knowledge, data, and experiences so that the goals are easily transitioned to reality.

We plan to get rooted, keep nurturing our knowledge, and grow from there.

4 - Have Some Fun

> "To make honey, young bee need young flower, not old prune."

In a moment of profound wisdom, **Mr. DogeMiyagi** imparted to Doge the importance of mingling with other audacious young companions, forging connections, honing social skills, and reveling in shared experiences.

In the realm of cryptocurrency, **Mr. DogeMiyagi** likens these "intrepid young souls" to the "community members" who present us with the most formidable challenges. By doing so, they grant us invaluable opportunities to delve deeper into their priorities and aspirations.

Gaining insight into the expectations of our community members empowers **Mr. DogeMiyagi** to unveil a myriad of captivating initiatives and programs. By doing so, he aims to enrich our community members, enabling them to indulge in boundless enjoyment and reap significant returns on investment, simply by being an integral part of the ecosystem.

Out of all the blockchain kingdoms out there in the wild, why did Master **DogeMiyagi** decide to build on Ethereum? What makes it so unique and how can it help the **$MIYAGI** token holders? It is because Ethereum is super popular, super green, and super extensive.

1 - SUPER EXTENSIVE

Ethereum stands as a pillar of reliability, having withstood the test of time through years of operation and billions in value exchanging hands. As one of the largest programmable blockchains, it boasts a vast and dedicated global community.

An immense web 3.0 development collective tirelessly works to refine the Ethereum network, ensuring the seamless operation of the myriad smart contracts and decentralized applications built upon it.

Etherscan data reveals that, as of January 14, 2023, the Ethereum blockchain encompasses over 219 million distinct addresses, with a daily increase of 77,652. This expansive community size exposes **$MIYAGI** token holders to a flourishing and diverse ecosystem, teeming with growth and potential.

2 - Super Popular

Ethereum's status as a programmable blockchain, offering a software network that enables the creation of novel tools, apps, DeFi, smart contracts and NFTs, sets it apart from its contemporaries and cements its widespread popularity.

This groundbreaking protocol houses an impressive array of top-tier Dapps, including, but not limited to, OpenSea, Uniswap, Manifold and MetaMask. Furthermore, CoinMarketCap highlights Ethereum's staggering $10 billion daily trading volume, attesting to its esteemed reputation within the enterprise business sphere.

A recent Etherscan report, published in December 2022, unveiled that **Ethereum** processes over 1 million daily transactions. This staggering figure underscores the immense influence **Ethereum** has managed to wield within the blockchain landscape.

3 - Super Green

Ethereum blockchain is green because it employs a proof-of-stake consensus mechanism in which the cost of participation is determined by the economic cost of staking coins instead of the computing cost of solving mathematical puzzles as in proof-of-work consensus.

As a result, the consensus method consumes less energy, making the system more environmentally friendly. The proof-of-stake algorithm used by **Ethereum** only consumes 0.0026 TWh/yr globally.

1 - KILLER SWAP MACHINE

Fueled by Uniswap, the Killer Swap Machine is a user-friendly decentralized exchange service enabling users to effortlessly trade the **$MIYAGI** token with various ERC-20 tokens and **Ethereum**. This mechanism facilitates seamless and instantaneous token swaps without any interruptions.

All a user must do is specify the desired token pair for trading and input the exchange amount. By effortlessly connecting decentralized wallets such as MetaMask, users can begin utilizing the Killer Swap Machine with ease.

All a user must do is specify the desired token pair for trading and input the exchange amount. By effortlessly connecting decentralized wallets such as MetaMask, users can begin utilizing the Killer Swap Machine with ease.

You will be able to configure the following settings on the Killer Swap Machine:

Toggle Dark Mode On/Off

Transaction Deadline (mins)

Default Transaction Speed

Toggle Expert Mode On/Off

Specify Slippage Tolerance

Disable Multihops

2 - DogeMiyagi NFTs

Presently, our **DogeMiyagi** NFT project is undergoing an intensive research and development phase. Designed to be an elite club for members seeking to delve into the vibrant **DogeMiyagi** ecosystem, martial arts, enticing freebies, nostalgic childhood recollections, and an upbeat atmosphere, this project promises a truly immersive experience.

Acquiring a **DogeMiyagi** NFT signifies more than just obtaining an avatar; it grants you privileged access to an exclusive domain, where the benefits and offerings are poised to continually expand and flourish.

In the near future, **DogeMiyagi** NFTs will be ready for users to mint directly from the official DogeMiyagi website, providing a seamless gateway to this exclusive world.

DogeMiyagi Products

1 - $MIYAGI Token Specification

SPECIFICATION	DETAIL
Token Name	Dogemiyagi
Ticker Symbol	$MIYAGI
Contract Type	ERC-20
Blockchain	Ethereum
Total Supply	96,192,515,112,011.00
Total Burn	96,182,996,300,000.00
Circulating Supply	9,518,812,011.00

$MIYAGI Token Allocation

To foster a sense of trust and transparency within our community, we have decided to lock our Marketing Wallet for an entire 12-month duration. This demonstrates our commitment to the project's long-term success and reassures our community members of our dedication.

Once the initial 12-month lock period ends, we will release 10% of the wallet's funds each month. This gradual release ensures responsible and strategic use of marketing resources, enabling us to support the project's ongoing growth and development effectively.

From the 13th month onwards, we will embark on a 10-month Vesting cycle. Throughout this period, 10% of the wallet's remaining balance will be unlocked monthly, providing us with the necessary funds to execute impactful marketing campaigns and further boost the project's visibility and reach.

To maintain transparency and allow our community members to monitor the wallet's status, we have shared a link to Pinksale. This platform grants easy access to the wallet's information, empowering our community to stay informed and engaged at all times. This careful approach to managing our Marketing Wallet showcases our dedication to building a strong, reliable, and successful project for our valued community members.

Total	100%	9,518,812,011.00

In a heartfelt tribute to the Karate Kid movies, **Mr. DogeMiyagi** has designed a unique token burn process that mirrors the spirit of the films. The presale is divided into eight stages, each representing one of the Karate Kid movies. Upon the completion of each stage, a specific number of tokens will be burned, with the burn amounts reflecting the official US release dates of the movies. As a grand finale before the token launch, a significant burn will take place, honoring the passing of **Mr. Miyagi** at the age of 86 years and 5 months. This innovative and nostalgic approach to the token burn process not only showcases Mr. **DogeMiyagi's** appreciation for the films but also strengthens the connection between the project and its underlying inspiration.

$MIYAGI Token Burn Schedule

Token Burn Stage	Total Tokens Incinerated	Karate Kid US Release date
DogeMiyagi I Burn	2,206,198,400,000.00	22nd June 1984
DogeMiyagi II Burn	2,006,198,600,000.00	20th June 1986
DogeMiyagi III Burn	3,006,198,900,000.00	30th June 1989
DogeMiyagi IV Burn	1,208,199,400,000.00	12th August 1994
DogeMiyagi V Burn	1,706,201,000,000.00	17th June 2010
Total Stages Burn	**10,132,996,300,000.00**	
Mr. DogeMiyagi's Death Burn	86,050,000,000,000.00	86 years and 5 months
Total Token Burn	**96,182,996,300,000.00**	

Mr. DogeMiyagi ardently advocates for decentralization and peer-to-peer value exchange. Bearing this goal in mind, the vision from the outset was to evolve the **DogeMiyagi** ecosystem into a DAO.

A DAO, or decentralized autonomous organization, is an assembly of individuals who collaborate in a fluidly structured organization, wherein each participant is accountable to the others without the need for a central authority.

Decision-making typically occurs through collective governance, with rules and regulations enforced by code. Holding **$MIYAGI** tokens in the contract qualifies you as a DAO member, granting you the right to vote on developmental proposals.

The intent of a DAO is to enhance the conventional management framework of many organizations. Rather than depending on a sole individual or a select few to steer the entity's direction, a DAO seeks to empower every member with a voice, a vote, and the ability to put forth new initiatives.

Mr. Dogemiyagi's rationale for adopting a DAO structure can be summarized in the following key points:

Maximum Transparency	Decentralization	Community Involvement	Improved Trust
Increased Engagement	Improved Structure	Use of Smart Contracts	No Shutdown

In addition to modeling the **$MIYAGI** into a community-led token, the ownership will also be renounced after launch.

ROADMAP

Launch DogeMiyagi Website
